

Project: Mall Drive Bridge

Recipient: City of St. George, Utah

Location: St. George, Utah

Purpose: When the City updated its Traffic and Transportation Masterplan in 2006, a critical need was identified to provide an additional arterial route across the Virgin River to serve the rapidly growing area of the South Block, the replacement airport, Washington Fields and Little Valley. This new 650-foot, five-lane bridge from Riverside Drive across the Virgin River to 3000 East will provide convenient access to schools and commercial areas from the Replacement Airport, Ft. Peace Industrial Park and residential areas of the Washington Fields.

Amount: \$5,000,000
